MONEY, BONDS AND STOCKS. An Increase of Activity and Strength, Accom-

psnied by a Broadening Tendency.

NEW YORK, Sept. 27 .- Money on call was easy at 14@2 per cent., the last loan being made at 2, closing offered at 2 per cent Prime mercantile paper, 51 @ 71 per cent.

Sterling exchange was dull but steady at \$4.837 for sixty-day bills, and \$4.871 for demand. The total sales of stocks to-day were 432,276 shares, including the following: Delaware, Lackawanna & Western, 20,405; Erie, 4,010, Lake Shore, 15,235; Louisville & Nashville, 4,802; Michigan Central, 7,020; Missouri Pacafic, 6.050; Northwestern, 34,395; Northern Pacific preferred, 17,160; Oregon Transcontinental, 21,550; Reading, 3,180; Richmond & West Point, 7,625; St. Paul, 84,976; Union Pacific,

32,260; Western Union, 17,335. The stock market was not only more active and stronger to-day, but there was a decided broadening tendency, while the bullish feeling in some stocks ran high. London was a buyer on all of its specialties, and this influence was seconded by a liberal number of purchases for demestic account, which extended to all portions of the list. The expectation that the granger roads would finally arrange their differences was strong this morning; a more confident speculation for the "long" account was the result, and other stocks besides those most interested were freely taken . The most conspicuous stocks in the forenoon were the Vanderbilts, New England and the grangers, but New England was rather weak, though there were no new developments made public to affect the stocks. The Southern stocks were all more quiet, but the Gould stocks became more prominent and Union Pacific later became a strong feature of the trading. The news from Chicago that the St. Paul had expressed its willingness to accept a proposition from the other roads in regard to the milling-in-transit business gave those reads a grand lift, and St. Paul bounded up sharply, the rest following, and the upward movement inaugurated ceased only with the close of business. All the grangers made material advances, and the remainder of the list sympathized to a limited extent, but higher figures all around was the rule. The August statement of the Pennsylvania and the announcement that the company had ordered an advance in grain rates belped the trunk lines, but the coal stocks were rather sluggish all the way out. There was very heavy realizing, but the covering of "shorts" completely neutralized the effect of such sales, and the advance mat with no set-back from first to last. The opening prices were all higher this morning, and, with the excaption of New England and Norfolk & Western preferred, made further gains in the early trading, which was very active. Big Four, C., C., C. & I. and Cotton Oil were the leaders of the advance at first, but Union Pacific afterward came to the front, and the result of the forenoon's business was to leave almost everything on the list materially higher. The grangers then became the features of the market, followed by the Gould stocks, while the general list was comparatively sluggish. The ndvance was checked toward 2 P. M., but was resumed again in the last hour, when the whole list again moved up in unison. The close was active and strong at the highest prices reached. Everything is higher again this afternoon, and St. Paul rose 24; Burlington & Quincy, 24; Missouri Pacific, 18: Big Four, 14: Union Pacific and C., C., C. & I. It each; Consolidate Gas, 1 per cent, and others fractional amounts.

The railroad bond market was also more active and a stronger tone marked the dealings, though many issues are lower to-night. The sales were \$1,644,000, of which Fort Worth & Denver firsts contributed \$183,000 and the Chesapeake & Ohio currency certificates \$12,000. The advances include Northwestern coupon, gold sevens, 2, to 132; Utsh Southern extension sevens, 2, to 97, and Green Bay incomes, 24, to 324. Government bonds were dull and steady to

CHICAGO, Sept. 27 .-- A genuine surprise was in store for operators in wheat in this market to-day, and it developed in the shape of a material advance in price, where many operators had expected a decline. September was advanced 22c over the closing price of yerterday, or to \$1.26, with large settlements made at \$1.25. This was the principal feature of the day, but not the least unexpected was the advance of 3te in October, 2je in December, and 1je in May delivery. The entire list scored an advance, and the feeling was greatly unsettled. A feverish excitement characterized the trading. The opening was weak, and early trading was 1 211c below the closing figures of yesterday; then followed numerous small fluctuations, after which the market became strong and advanced to to at a time for the deferred futures, until the advance above noted was established, while September advances amounted to 2 woo between trades; in fact, there was not much wheat to be had until the \$1.25 mark was reached. The "shorts" were amazed at the turn of affairs. Operators also commenced to argue that if September was so easy of manipulation, what might "shorts" for October expect, and this created a sharp demand for that future, which carried prices 1 72c above those ruling for December. The receipts reported of contract wheat are very small, most of the receipts reported here being billed through. It was also rumored that Minneapolis millers were bidding for the old wheat held here, which rumor helped to strengthen the already unsettled feeling. Foreign advices quoted dull and heavy markets, Liverpool being lower, and London quoted cargoes on passage as weaker. Domestic markets were easier early, but rallied somewhat on the prices in the Chicago market were 21c higher for September, 2fc for October, and lie for December, and twie higher for May than closing figures of yesterdey. There was only a moderate business in corn, the activity of wheat withdrawing the interest from this cereal to a considerable extent. The opening, however, was fairly active, and most of the trading was in the early part of the session. The feeling was easy early, and later showed some strength, due to the advance in wheat, but toward the close the market reacted to the inside prices of the day, owing to the free sales of October by a heavy operator. Opening sales were 1010 below the closing price of yesterday; the market then fluctuated within a ic range and closed i wie lower than yester-day. Oats were neglected and quotably about to easier. A fair business was transacted early in pork, but later the excitement in grain attracted the attention of operators and the market became quiet. The market opened about the same as yesterday's close, advanced 35c for October, and 5@7 to for the more deferred futures, reacted slightly, but became firmer and closed about at the outside prices. Lard was in moderate demand and easier, but fluctuations were confined to a small range. October short ribs were in fair demand and stronger, opening at an advance of .20e and closing easy. The

INDIANAPOLIS MARKETS.

No Special Feature in Any Department of Trade Noticeable Yesterday.

INDIANAPOLIS, Sept. 27. The street was quite dull to-day, and trade was sluggish in all departments. There was nothing new in dry goods. Prices firm all around. In the grocery trade we find a slight tendency toward weakness in both coffees and sugars, though holders make no concessions as yet, and there is not sufficient indication in that direction to warrant small dealers and consumers in holding off. The hand-to-mouth policy of purchasing is somewhat emphasized. however, by the state of the market, and retailers buy with caution. Canned goods are quiet, owing to the abundance of all kinds of fresh fruits and vegetables. The conditions, however, are not such as prevailed last season. Then it was patent, long before the close of the packing season, that there would be a short crop, and packers had the bulk of their goods sold in advance. This year stocks remain in the hands of packers, who will, instead of the jobbers, bear the expense of holding them: but, as they seem well able to do so, it would be unwise to look for low prices. In the produce markets we have nothing new to report Fruits and are abundant, with a good demand, and prices, though low for some ticles, are in the mile satisfactory to the producer and shipper There is a better trade in flour, not only of the low grades, but of the better qualities. The advance in wheat has also been reflected in the flour market, and most grades have advanced about 25 cents per

barrel Miliers who have stocks of wheat in

warehouses are still picking up all the good mill-

ing wheat they can find at reasonable prices.

and holding their stocks, as, in the present tem-per of the grain market, and in view of the pos-

itive shortage in winter wheat, the opinion is

expressed that wheat might any day jump to \$1 in this market, which would make the present holdings of millers valuable property.

The wheat market is higher, in sympathy with markets at other points, with light receiptsthey being for the past two days but little more than half the amount posted for the preceeding two days. Offerings of corn are fully up to the requirements of the market. Mixed grades are in fair request, but white is little inquired for. Oats are firmer, with good jobbing inquiry. The closing bids on 'Change were as tollows:
